Vibrant, Full Colour Point of Sale Picture Cards Supplied FOC With Each Variety Ordered

Welcome to the latest edition of the Gedney Bulb Company catalogue. Based in the heart of the historic Lincolnshire Fens, our heritage is rooted in the rich, fertile silt soils that have made this region world-famous for flower production.

With 44 years of growing at Gedney Bulb Company, we pride ourselves on bridging the gap between traditional growing expertise and modern horticultural variety. This season, we are delighted to present a collection that celebrates the very best of British-grown bulbs alongside hand-selected treasures from the finest Dutch nurseries. Whether you are a retailer, professional landscaper, or a passionate allotment gardener, our goal remains the same: to provide the highest quality stock for a spectacular spring display.

From the iconic golden sweeps of our Lincolnshire daffodils fields, to the intricate, velvet petals of our specialist tulips, every bulb in this catalogue has been chosen for its vigour, health, and reliability. We invite you to explore our diverse range and join us in the timeless tradition of planting now to reap a harvest of colour.

IN DEPTH BULB PLANTING GUIDE SEE PAGE 34

NATURALISING BULBS

PLANTING DEPTH

Generally plant bulbs to a depth twice the height of the bulb. Potted bulbs can be just under the surface of the compost. **A good quality potting compost or bulb fibre is recommended.**

Once potted careful water management is essential to ensure the bulb is not over wet, yet damp enough to encourage rooting. Rodent control is important as mice can devastate tulips, fritillaria and anemone.

GROWING COLD

Involves potting the bulbs and growing them under unheated protection or outside. Under protection they will flower up to 2 weeks earlier than their natural season. Most varieties can be grown cold. Some bulb varieties can be grown in their natural season and included with herbaceous plant sales - allium, erythronium and camassia.

HOW TO PLANT LARGE VOLUMES OF BULBS?
USE OUR UNDER GRASS BULB PLANTER!

Do you have a large area of bulbs to plant under grass? Under grass planting is a time-consuming physical job that can be done poorly affecting the bulb performance by inconsistent planting depth. You can hire a machine from us that will reduce the planting time, saving labour cost and effort and will plant bulbs at a consistent depth that will improve flowering the following spring. The Mounted Under Grass Planter - A tractor mounted bulb planting machine that is capable of high-volume planting under grass and turf. You need a small compact tractor of 25hp plus to operate the machine. The machine cuts the turf, and the bulbs are planted directly underneath the turf at pre-set rates depending on the variety and bulb size. The machine re-firms the grass back into position. Full operation instructions come with the machine. Not suitable for very stony or hard clay soils.

TRACTOR MOUNTED UNDER GRASS BULB PLANTER

Hire charge: £200 per week Delivery & Collection from site charge: £120

FORCING

Involves potting the bulbs and giving them a 6-8 week period of cold and preferably dark conditions to emulate winter. When growth is showing (2-3" on hyacinth) uncover and bring in to the growing area where the temperature should not be more than 60°F to start, increasing the temperature gradually to encourage the bulb to flower early. Suitable varieties are hyacinths and paperwhites.

BULB STORAGE

Unpack bulbs on arrival or at least open outer boxes and open paper bags and preferably stand bags out. FRESH AIR AND AIR CIRCULATION ARE VITAL. Keep off concrete floors. Bulbs are best stored at an even temperature with low humidity. Prepared bulbs should be planted immediately.
