*Wholesale Bare Root Herbaceous  
and Pot Grown Liners 2024/25*

Tel: 01406 550341 • Email: [sales@gedneybulb.co.uk](mailto:sales@gedneybulb.co.uk)

Order Online @ [www.gedneybulb.co.uk](http://www.gedneybulb.co.uk)

## Welcome to our 2024-25 list of Bare Root Herbaceous and Pot Grown Liners

**Availability from early December to late February**  
**Early ordering is advisable - we can reserve plants until end of February,**  
**but plants are sold on a first come first basis.**  
**To keep up to date with our latest availability please order from the website.**

Both the potted and open ground plants are over wintered and grown hardy.  
 With open ground the plant size varies with root systems and varieties but a guide is that the plants are large enough to pot in to a 2 pot or split down for a smaller pot size.

Please specify on your order when you would like delivery, either week 50, 2, 4, 6 or 8 and we will endeavour to deliver to your date. As the seasons tend to be changing with a warmer Autumn, lifting bare root plants don't start until November. When some open ground varieties are sold out, we will automatically supply pot grown varieties (if available)

P9 pots are ordered in quantities of 24 per tray and Bare Root as 25, quantities smaller than this may be subject to a handling charge.

### Colour Labels....

Individual full colour bespoke labels are available for all varieties and will be supplied loose, packed with orders. Colour labels are priced at £80.00/1000

**Please mark the form if you require labels.**

Labels Required  
 @ 8p each

Yes	No

### How to order....

- Fill in this order form with your quantities against each variety
- Order online, using our quick and easy ordering system

### GROWING COLD

Involves potting the bulbs and growing them under unheated protection or outside. Under protection they will flower up to 2 weeks earlier than their natural season. Most varieties can be grown cold. Some bulb varieties can be grown in their natural season and included with herbaceous plants sales - allium, erythronium and camassia.

### FORCING

Involves potting the bulbs and giving them a 6-8 week period of cold and preferably dark conditions to emulate winter. When growing is showing (2-3" hyacinth uncover and bring in to the growing area where the temperature should not be more than 60°F to start, increasing the temperature gradually to encourage the bulb to flower early. Suitable varieties are hyacinth and paperwhites.

Grown at...

gedney
