ORDER ONLINE WITH OUR USER FRIENDLY WEBSITE

Order online @ www.gedneybulb.co.uk

We have revamped our website to make it more user friendly. With all the information you will need, including descriptions and pictures. It is quick and easy to use, with no login needed and calculates your order value and delivery charge (if below minimum order value)

Front Cover: Iris histrioides Katharine's Gold

FOR RETAILERS

We have a large selection of our 'colourful garden' range of prepacked bulbs, good value, simple, one price retail with multi-buy options, and larger 'colourful garden bulb bags' which have a very economical retail price per bulbs. Showcases where you lift the lid and start selling, also attractive wooden display boxes in a limited range.

All varieties we list you can buy in minimum quantities at no extra cost and these come delivered with free picture cards, this is an economical way to make a large display of bulbs at little cost. (I.e. tulip Apeldoorn priced £89.00 per 1000 you only pay £8.90 per 100 bulbs).

Together with nets of daffodils in different size boxes. The low minimum order value minimises overstocking and fast and efficient deliveries keep stock topped up. We supply bulb bags for all your loose sales.

Bulb Sourcing... let us know if you are looking for other varieties we can source from other growers... Please enquire.

FOR GROWERS

We list a range of the most popular varieties for potting on, marked by a 'P' in the list.

FOR NATURALISING AND LANDSCAPING

All bulbs are from cultivated stocks, including the true native bluebell *Endymion non scriptus*, and are suitable for growing in a range of situations from semi-shade to woodland, under grass to more formal plantings. Our planting guide suggests planting densities and locations.

BULB PLANTER FOR UNDER GRASS PLANTING

Do you have a large area of bulbs to plant under grass? Under grass planting is a time consuming physical job that can be done poorly affecting the bulb performance by inconsistent planting depth. You can hire a machine from us that will reduce the planting time, saving labour cost and effort and will plant bulbs at a consistent depth that will improve flowering the following spring.

The Mounted Under Grass Planter - A tractor mounted bulb planting machine that is capable of high volume planting under grass and turf. You need a small compact tractor of 25hp plus to operate the machine.

The machine cuts the turf and the bulbs are planted directly underneath the turf at pre-set rates depending on the variety and bulb size.

The machine re-firms the grass back into position. Full operation instructions come with the machine. Not suitable for very stony or hard clay soils.

TRACTOR MOUNTED UNDER GRASS BULB PLANTER

Hire charge: £200 per week
Delivery & Collection from site charge: £120

IN DEPTH BULB PLANTING GUIDE SEE PAGE 34

COLOURFUL GARDEN PRE-PACKS

A great retail selection of colourful and competitively priced bulbs. 80 varieties of pre-packed bulbs with all pre-packs at the same price and the opportunity to offer a multi-buy.

All barcoded and with eurolocks. All pre-packs cost £1.30 each, in units of 15 per variety. Suggested selling price £2.99 each, multi buy 4 for £10.00.

You Can Select:

1. CHOOSE YOUR OWN PRE-PACKS

from the 80 varieties as shown on the following pages. You can pick any varieties you wish but they must be in full cases of 4 varieties per 15 pre-packs. (15 is the minimum for any variety and one full case is the minimum). Please use the code numbers as listed.

2. CHOOSE FROM OUR INDIVIDUAL BULB COLLECTIONS

Each collection is 15 pre-packs x 4 different varieties = 60 pre-packs per case. £1.30 per pack. **Cost of each collection = £78.00**

PLANTING DEPTH

Generally plant bulbs to a depth twice the height of the bulb. Potted bulbs can be just under the surface of the compost. A good quality potting compost or bulb fibre is recommended.

Once potted careful water management is essential to ensure the bulb is not over wet, yet damp enough to encourage rooting. Rodent control is important as mice can devastate tulips, fritillaria and anemone.

GROWING COLD

Involves potting the bulbs and growing them under unheated protection or outside. Under protection they will flower up to 2 weeks earlier than their natural season. Most varieties can be grown cold. Some bulb varieties can be grown in their natural season and included with herbaceous plant sales - allium, erythronium and camassia.

FORCING

Involves potting the bulbs and giving them a 6-8 week period of cold and preferably dark conditions to emulate winter. When growth is showing (2-3" on hyacinth) uncover and bring in to the growing area where the temperature should not be more than 60°F to start, increasing the temperature gradually to encourage the bulb to flower early. Suitable varieties are hyacinths and paperwhites.

BULB STORAGE

Unpack bulbs on arrival or at least open outer boxes and open paper bags and preferably stand bags out. FRESH AIR AND AIR CIRCULATION ARE VITAL. Keep off concrete floors. Bulbs are best stored at an even temperature with low humidity. Prepared bulbs should be planted immediately.
